Course Description
This course is an introduction to the fundamentals of geology. Students explore space and the solar system, and examine geologic and Earth surface processes that have shaped the Earth and life through time. It investigates large Earth systems including Earth composition and structure, the rock cycle, plate tectonics, earthquakes, and volcanic eruptions. Students study the origins of life, evolution and mass extinction and a practical introduction to minerals, rocks and fossils provides insight into Earth's past and important mineral resources.
