UCEAP Semester Units

1.30

Course Description

This skills course teaches students how to conduct the semi-structured clinical interview for the DSM-5 (SCID I) and Axis II (SCID II) diagnoses. Students learn to carry out the interview and to interpret the outcomes, to establish differential diagnoses, and to summarize findings in a written report. Special emphasis lies on comparing the patient's answer to a question and the clinical judgement of stating whether certain behavioral criterion is met or not. Note that this training is not restricted to anxiety psychopathology, but to psychopathology in general.

Language(s) of Instruction
English
