Course Description
The first part of this course introduces the major theories of the aetiology of psychological and psychiatric disorders, and reviews research on the treatment of these disorders. The second part examines the major theoretical perspectives and empirical research on the role of psychological and social factors in the aetiology of disease. The course covers some core topics in health psychology including the role of psychological, social, and behavioral factors in the onset and maintenance of disease, together with psychological responses to illness and the experience of hospitalization and treatment.
