

COURSE DETAIL

INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE

Country

Netherlands

Host Institution

Maastricht University - Center for European Studies

Program(s)

Psychology and Neuroscience, Psychology and Neuroscience, Maastricht

UCEAP Course Level

Upper Division

UCEAP Subject Area(s)

Psychology

UCEAP Course Number

127

UCEAP Course Suffix**UCEAP Official Title**

INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE

UCEAP Transcript Title

COMPUTATN NEUROSCI

UCEAP Quarter Units

6.00

UCEAP Semester Units

4.00

Course Description

In this course students receive an overview of the basic principles of connectionism and neural networks ranging from simple to complex models of neurons and their interconnections. Students learn how these models are used to study brain function for a wide range of topics including vision, decision making, and higher cognition. The course begins by identifying the brain, its structures, and their function. Also covered is the type of information processing carried out in the neural structures and what the physical and biological constraints are within those neural structures.

Language(s) of Instruction

English
