COURSE DETAIL

ENERGY AND RESOURCE MANAGEMENT
Country Netherlands
Host Institution Leiden University College
Program(s) Leiden University College
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Environmental Studies
UCEAP Course Number 115
UCEAP Course Suffix
UCEAP Official Title ENERGY AND RESOURCE MANAGEMENT
UCEAP Transcript Title ENERGY&RESORCE MGMT
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description
This course provides an introduction to the field of natural resource management and the concept of sustainable development. Natural resources include both renewable resources (such as water, forests, wildlife) and non-renewable resources (such as fossil fuels). This course adopts a systems framework that allows students to explore the connections among different elements in the context of global environmental change, human needs and impacts, and the need to reframe and revitalize our current approaches to resource management. The course explores local and global resource and environmental issues such as the commodification of nature, the management of national parks and protected areas, ethics, and our ability to ensure sustainable energy supplies. Throughout the course, students investigate practical solutions to address, or begin to address, these issues.
