UCEAP Course Suffix
Y

UCEAP Official Title
INFORMATION TECHNOLOGY AND THE LAW

UCEAP Transcript Title
INFO TECH & THE LAW

UCEAP Quarter Units
12.00

UCEAP Semester Units

8.00

Course Description

In this survey course, students critically assess a selection of fundamental legal issues in the field of Information Technology (IT) Law. Students are introduced to key debates in technology and internet governance: do we need distinct legal rules to regulate technological systems? Who does, and should, enact these rules? Are technological systems like the Internet neutral, and should they be? Once students are equipped with this knowledge of technology governance and the challenges this poses for the law, they go on to consider how the law has responded to the challenges brought about by technological systems and the extent to which legal issues have shaped the development of information society policy. The course does this by examining the key issues under three headings: data; digital platforms and current challenges.
