PLANT BIOLOGY

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

This course examines plant biology, spanning from evolution, ecology, conservation, agriculture to biotechnology. Topics include plant biodiversity and function, adaptation to environments, interactions with beneficial and pathogenic organisms and improvement for human uses. The wide-ranging roles and uses of plants are also explored with view of food and a sustainable future.

## Language(s) of Instruction

English
