6.00

UCEAP Semester Units

4.00

Course Description

This undergraduate research course (UROPS) provides students the opportunity to work under the mentorship of NUS faculty and experience the challenges and benefits that come from pursuing an independent research project. It provides undergraduate students the opportunity to foster mentoring relationships with faculty and research staff while working in a specific area of study. This program allows students to engage actively in research, discussions, intellectual communications and other creative activities. Through the typical phases of doing research, students are able to enhance their knowledge in the latest development of science and technology; acquire special communication and presentation skills; experience creative thinking; interact and forge closer ties with the established scientists and members of their groups.
