UCEAP Transcript Title SINGAPORE BUILT ENV
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course introduces the rationale for, and process of, the emergence and growth of Singapore's built environment from a third world country to a world class city. It enables students to have an understanding and appreciation of the economic and social aspects and implications of how properties and infrastructure are developed and managed, given the constraints that Singapore faces. It also encourages them to develop alternative views on how the built environment can help Singapore continue to prosper and remain relevant in the region.
