Course Description

This interdisciplinary course analyzes the relationship between science, technology and society, in order to examine how science and technology are currently transforming the world, how they have done so in the past, what is society's responsibility to the changes, and what can be learned to better prepare for the future. Topics covered include contemporary debates such as the incorporation of gender in the field of science, technology and society studies, and the expansion of cybernetics and the internet in the Global South.
