DRUGS, BRAIN, AND BEHAVIOR

**UCEAP Transcript Title**

DRUG/BRAIN&BEHAVIOR

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

This course offers students an overview of the psychological, pharmacological, neurobiological, and neurophysiological bases of drug use, abuse, and contemporary understanding of addiction (and some mental conditions), and has a strong natural science (neuroscience) orientation. The acute and long-term effects of selected drugs of abuse on behavior, mood, cognition, and neuronal function are discussed using empirical findings and theoretical developments from both human and non-human subject studies on the neurobiological and psychological basis of drug action and addiction.

### Language(s) of Instruction

English
