Course Description
This course introduces the discipline of social psychology, including the knowledge of central topics and key areas of research inquiry in this field. The course covers a series of fundamental topics in this area, including prejudice, stereotyping and social cognition, group processes, inter-group conflict, the self, and social influence. To reflect the breadth and depth of social psychological research currently carried out in the UK and worldwide, the course draws upon studies across different approaches and traditions, highlighting current research and classic studies that illuminate the nature of social thinking and behavior.
