UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course introduces students to the purpose, operations, and implications of management by exploring the contexts within which management takes place. Students reflect on management in relation to the social, economic, technological and legal conditions within which it operates, and analyze political and environmental consequences. We often think of management as trying to manage flows of energy, finance and labor, but it increasingly is required to confront changing social and political structures on a world scale, and challenging environmental conditions as well.
