Course Description
This course develops models of the goods, money, and labor markets, and examines issues in macroeconomic policy. Topics discussed include macroeconomic relationships, consumption, investment, money and employment. Macro-dynamic relationships, especially those linking inflation and unemployment, are also considered. Exchange rates and open economy macroeconomics are also addressed. In the last part of the course, topics include the determinants and theories of economic growth, productivity and technology, the dynamics of the business cycle, counter-cyclical policy, and the relationship between micro and macro policy in the context of recent Australian experience.
