Course Description

The course provides an economic analysis of problems and challenges found in business and other organizational settings. It examines the concept of asymmetric information and its implications for business organization as well as the concepts of horizontal and vertical integration. Other topics covered in the course include: selection, asymmetric information, adverse selection, signaling, and screening; explicit incentives, optimal compensation contracts and the trade-off between incentives and insurance; implicit incentives and organization; horizontal boundaries, scale and scope economies, network externalities, and diversification; vertical boundaries, transaction costs and vertical integration.
