UCEAP Quarter Units 4.00
UCEAP Semester Units 2.70

Course Description
This course explores the relationship between psychology and the environment, and how the latter affects human behavior. It examines both the built environment and the psychology environment and their effects. The course focuses on the effects the environment has on humans and how to reduce or manage them. Students learn to identify environmental hazards in their own communities and critically assess how to control and manage them.
