# **COURSE DETAIL**

#### PRINCIPLES OF BIOBASED ECONOMY

## **Country**

Netherlands

#### **Host Institution**

Wageningen University and Research Center

## Program(s)

Wageningen University

#### **UCEAP Course Level**

**Upper Division** 

## **UCEAP Subject Area(s)**

**Environmental Studies** 

#### **UCEAP Course Number**

126

### **UCEAP Course Suffix**

#### **UCEAP Official Title**

PRINCIPLES OF BIOBASED ECONOMY

## **UCEAP Transcript Title**

**BIOBASED ECONOMY** 

## **UCEAP Quarter Units**

5.00

### **UCEAP Semester Units**

3.30

### **Course Description**

This course explores how to create a sustainable future by moving away from dependence on fossil resources to biomass resources for the production of food, chemicals, and energy carriers. Microorganisms and catalysts to create biobased products are discovered and then learning how to market and sell those products within a profitable business model is reviewed. This course provides a solid foundation of relevant concepts in the biobased economy and biobased products by reviewing an introduction to biobased sciences, production of biomass, biorefining, achieving sustainability, consumer behavior, bioconversion, (bio)chemical conversion, business, logistics and supply chains, and economy and regulations.

## Language(s) of Instruction

English

### **Host Institution Course Number**

BCT23806

#### **Host Institution Course Title**

PRINCIPLES OF BIOBASED ECONOMY

#### **Host Institution Course Details**
