LAND, FOOD, AND COMMUNITY III: LEADERSHIP IN CAMPUS FOOD SYSTEM SUSTAINABILITY

UCEAP Transcript Title
LAND FOOD&COMMUNITY

UCEAP Quarter Units
6.00

UCEAP Semester Units
4.00

Course Description
This course utilizes an applied learning, team-based approach to examine and address food system sustainability challenges and opportunities on the UBC-Vancouver campus. Students apply skills and concepts derived from earlier coursework, experience, and areas of specialization to address contemporary challenges in an integrative, interdisciplinary setting. The central theme of this course is the envisioning, planning, implementation, and evaluation of projects aimed at enhancing the ecological, economic, and social sustainability of the campus food system. The course provides opportunities for students to analyze food-related academic literature and food system issues experienced in the UBC-Vancouver campus and broader regional and global contexts. Students complete a UBC Food System Project, by engaging with the UBC food system by acting as junior professional consultants with campus clients and community stakeholders with the aim of enhancing the sustainability of the campus food system in an integrated disciplinary setting.
