COURSE DETAIL

NATURAL LANGUAGE PROCESSING

Country
United Kingdom - England

Host Institution
Imperial College London

Program(s)
Imperial College London

UCEAP Course Level
Upper Division

UCEAP Subject Area(s)
Computer Science

UCEAP Course Number
159

UCEAP Course Suffix

UCEAP Official Title
NATURAL LANGUAGE PROCESSING

UCEAP Transcript Title
NATURAL LANG PROC

UCEAP Quarter Units
5.00

UCEAP Semester Units
3.30

Course Description

Students learn about the foundations, building blocks, and applications of Natural Language Processing (NLP), with an emphasis on approaches based on deep learning. They study the models used to represent words and word meanings. They then use these representations to study classification tasks (e.g. sentiment analysis) and tagging tasks (e.g. part of speech tagging). In addition students view languages as sequences of variable length, from pure language models to machine translation models. Finally students explore approaches that are based on modern neural machine learning algorithms, where linguistic information is provided by instances of uses of language.

Language(s) of Instruction
English
