# **COURSE DETAIL**

#### **IMAGE PROCESSING**

## **Country**

United Kingdom - England

#### **Host Institution**

University of London, Queen Mary

## Program(s)

University of London, Queen Mary

### **UCEAP Course Level**

**Upper Division** 

## **UCEAP Subject Area(s)**

**Computer Science** 

### **UCEAP Course Number**

142

#### **UCEAP Course Suffix**

#### **UCEAP Official Title**

**IMAGE PROCESSING** 

## **UCEAP Transcript Title**

**IMAGE PROCESSING** 

## **UCEAP Quarter Units**

6.00

#### **UCEAP Semester Units**

4.00

#### **Course Description**

The aim of this class is to give you an introduction to digital image processing and uses programming language Java to implement simple applications in low level image processing. Topics covered include: image representation image sampling and display image transforms and image enhancement using point and spatial operations image processing methods such as convolution, frequency filtering and image restoration, compression and segmentation.

## Language(s) of Instruction

English

### **Host Institution Course Number**

ECS605U

#### **Host Institution Course Title**

**IMAGE PROCESSING** 

## **Host Institution Campus**

**Host Institution Faculty** 

# **Host Institution Degree**

# **Host Institution Department**

School of Electronic Engineering and Computer Science
