UCEAP Course Suffix
UCEAP Official Title MICROECONOMICS, BEHAVIORAL ECONOMICS, AND GAME THEORY
UCEAP Transcript Title BEHAVIOR&MICROECON
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course looks at different ways of analyzing economic situations at a micro-level by building on microeconomic concepts learned from an introductory level Economics course. Familiar concepts are discussed in more depth and in a more mathematical way, while new concepts, such as the Slutsky equation, compensating, and equivalent variation are introduced. Game theory, the study of multi-person decision problems, and behavioral economics are also introduced. Behavioral economics adds insights from the field of psychology to the traditional economic rational-choice and equilibrium models. The course emphasis is on behavioral economics, for which students are required to carry out independent research.
