Course Description

This is a course about early language acquisition. Students learn to describe pre-linguistic and early linguistic development in children; outline the stages of phonetic and phonological development in typically-developing children; analyze the salient phonetic and phonological characteristics of speech samples from children typically developing speech; explain how children's vocabulary develops in the pre-school years; outline the course of early grammatical development in children; describe the processes involved in early simultaneous and sequential bilingualism; and appreciate the effects of early language delay and disorder on the acquisition of speech, language and communication.
