3.30

Course Description

This course is designed to make sense of complexity, utilizing an inter-disciplinary approach to understand the political economy of natural resource governance, particularly in relation to power, conflict and transformation, in various forms. The course begins with examination of key theoretical and ideological underpinnings related to natural resource governance, synthesizing and critically assessing different academic fields. This foundation is utilized to then examine some of the most pressing contemporary global issues, with country and regional specific examples including from Africa, the Americas, Asia, Europe and the Pacific.
