UCEAP Course Suffix S
UCEAP Official Title CLINICAL TRIALS
UCEAP Transcript Title CLINICAL TRIALS
UCEAP Quarter Units 6.00
UCEAP Semester Units

4.00

Course Description

Students are introduced to the fundamental principles of clinical research studies, with emphasis on clinical trials rather than observational studies. Students are guided through the design, conduct, and analysis and reporting of clinical trials and the common sub-studies often added to them (e.g. health economics). Students are also introduced to systematic reviews and meta-analyses and the important role they play in answering important clinical research questions. A session of the course is dedicated to the role patients and consumers can play in clinical trial design, conduct, and reporting.

Language(s) of Instruction
English
