## Course Description

This course explores some of the most relevant scientific contributions regarding the nature of moral judgments and examines in particular, the origin, function, and psychological framework of moral judgments. Topics include: the evolution of the human ability to judge morally; psychological underpinnings of moral judgments; cultural variability and effect on the ability to make moral judgments or reasonings; the notion of moral and legal responsibility; the existence of a "moral character"; responses to disagreement and apparent moral relativism; the objectivity of moral principles.
