**UCEAP Semester Units**

4.00

## Course Description

Internet and Internet-related protocols have evolved to constitute the common network structure for all data and telephone communication. This course gives an overview of some of these protocols and takes a deep look into a selection. The course provides students with thorough knowledge, both theoretical and practical, about the constructions of the most central internet protocols. In particular, a deeper technical understanding is provided for (among others) the following: transport protocols, routing principles, and application examples.

## Language(s) of Instruction

English

## Host Institution Course Number

ETSF10

## Host Institution Course Title

INTERNET PROTOCOLS
