UCEAP Course Number 129
UCEAP Course Suffix
UCEAP Official Title ACUTE AND CHRONIC INFECTIOUS DISEASES
UCEAP Transcript Title INFECTIOUS DISEASES
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course provides an understanding of the important and common infections, and the diseases that they cause, in the population. Teaching relates not only to UK infectious disease epidemiology but also to other global regions. Students cover a range of topics, including: basic principles of infection and immunity, social, economic and structural changes as drivers of change in infectious disease, Spanish Flu 2018 to Coronavirus 2020: successes and challenges in response to epidemics/pandemics, sexual health and sexually transmitted diseases, vector-borne infections, how climate, geography and environment affect infectious diseases in human populations, public health interventions (e.g. behavior/surveillance) to improve infection control, vaccine-preventable diseases, vaccine policy and implementation, and antibiotics and antibiotic resistance. Infections that cause “non-communicable” diseases.
