COURSE DETAIL

INFECTION
Country United Kingdom - England
Host Institution University College London
Program(s) University College London
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Biological Sciences
UCEAP Course Number 156
UCEAP Course Suffix
UCEAP Official Title INFECTION
UCEAP Transcript Title INFECTION
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description
This course provides a foundation in the fascinating and important discipline of infection. Common pathogens, including bacteria, viruses, fungi, and parasites are discussed in relation to their biology and the diseases they cause. The focus of the module is pathogenicity: the capacity to cause disease. Students consider how the immune system provides protection against infection, as well as how pathogens manage to flourish in the face of the formidable array of host protective mechanisms. The course also examines how vaccines and drugs can be used in the fight against infection.
