8.00

**UCEAP Semester Units**

5.30

## Course Description

The course is organized around three major themes: values, voting, and trust. The first theme concerns citizens' belief systems, notably their political attitudes and values: how are these structured, what explains them, how are they changing? The second theme concerns electoral behavior: why do people vote (or not) at all, and if they do, how do they choose among the parties? Finally, the course covers generalized "political trust" in democratic institutions and processes. Is political trust on the decline, and if so where and why? What are the broader consequences of political trust for politics and society? In all three parts, the course emphasizes the interplay between citizens and political parties: how do these affect and react to each other? In each part, moreover, the course considers a variety of explanatory factors, including deep-seated explanations connected to social background (e.g. class, education, gender) as well as more short-term explanations (e.g. election campaigns, fluctuating economic interests, and the performance of the incumbent government).
