Course Description

The course introduces field study and geological surveying methods. The teaching material is lecture based and includes the concept of field geological surveying and the Heng-Chun Peninsula, which the class will embark on a four-day trip to Southern Taiwan to examine the rock and land formations of the area. Field practice is held during the semester, and performance during the field observation is the main determinant for performance assessment. A final examination is given after the field study, covering information on land formations, geological mapping, etc.
