Course Description

This course explores the philosophy and politics of food and agriculture from international and comparative perspectives. It examines global food systems; their role in the transformation of agrarian societies, and their environmental effects. The political portion of the course focuses on governance, development, and the role of key institutions in shaping food systems. The philosophical portion of the course explores the values underlying food and agriculture in the United States and Japan, along with efforts to develop more just and sustainable food systems. The course also discusses genetically modified plants, food safety, agricultural intensification/Industrialization.
