Course Description
This course gives the student the opportunity to study specialized topics of their interest within an area of machine design that may not be covered by the traditional courses. For students from abroad, this course opens up the possibility to choose a project related to a course that they may not be able to participate in. Students may choose their own project topic or select one proposed by the supervisor or an outside company. Students are responsible for establishing their own timelines for the theoretical study part of the project, carry out their study independently of regular lectures, and prepare a final report on their findings/results.
