CHILD LANGUAGE: DEVELOPMENT, DISORDERS AND INDIVIDUAL DIFFERENCES

UCEAP Transcript Title
CHILD LANGUAGE

UCEAP Quarter Units
6.00

UCEAP Semester Units
4.00

Course Description

In this course, students explore how children acquire language and the factors influencing early language development. While language learning may seem effortless, students examine various aspects of acquisition to understand this complex process. Topics include gestures and accents, vocabulary growth, the role of sleep, language learning in non-laboratory environments, and the impact of television and electronic devices. Students focus primarily on typical development but also consider insights from children with developmental disorders and learning differences.
