Course Description

This course focuses on Martin Heidegger's thoughts on technology as they developed post-war and increasingly became part of the French and European landscape. It examines Heidegger's thoughts as well as those of others that debated in the 1940s and 1950s, including Adorno, Horkheimer, Hans Jonas and Arnold Gehlen; and current thinkers like Giorgio Agamben or Harmut Rosa. The course provides a critical reflection on technology, modernism, and the notion of progress.
