Course Description

This course is designed to help students establish a solid understanding of how cells and nutrients contribute to health and body functions by interacting with each other. The students are provided with an introduction to key concepts relevant to molecular and cell biology and cellular nutrient metabolism, and have the opportunity to learn and discuss how cells handle nutrients and how nutrients contribute to cellular health and functioning. Nutritional science is highly interdisciplinary. This class concerns a part of the broad array of topics relevant to nutrition, particularly with focuses on the molecular and cellular aspects of food components essential to the body.
