

# COURSE DETAIL

## PHYSIOLOGY 3

**Country**

United Kingdom - Scotland

**Host Institution**

University of Edinburgh

**Program(s)**

Scottish Universities, University of Edinburgh

**UCEAP Course Level**

Upper Division

**UCEAP Subject Area(s)**

Biological Sciences

**UCEAP Course Number**

154

**UCEAP Course Suffix****UCEAP Official Title**

PHYSIOLOGY 3

**UCEAP Transcript Title**

PHYSIOLOGY 3

**UCEAP Quarter Units**

8.00

**UCEAP Semester Units**

5.30

## Course Description

Selected aspects of physiological processes in health and disease: from the integrative function of single cells to whole systems physiology. A core emphasis is on the experimental basis for our foundational knowledge of how physiological systems function and their regulation. Topics may include: cell and epithelial physiology, ion channels and transporters and their regulation, cell signalling and communication, endocrine and neuroendocrine physiology, sensory physiology, control and co-ordination of movement, control of feeding and responses to stress.

### Language(s) of Instruction

English

### Host Institution Course Number

BIME09004

### Host Institution Course Title

PHYSIOLOGY 3

### Host Institution Campus

Edinburgh

### Host Institution Faculty

### Host Institution Degree

### Host Institution Department

Biomedical Sciences
