**Course Description**
This course introduces general concepts of environment, natural resources, and sustainable development. The topics include pressing global, regional and local environmental changes; life-supporting systems of our planet; biodiversity and its conservation; atmosphere, water resources, and their pollutions; solid and hazardous waste management; environmental health and sustainable development. The course provides a better understanding of the root-causes of the upfront environmental issues.

**Language(s) of Instruction**
English

**Host Institution Course Number**
LIFS1030

**Host Institution Course Title**
ENVIRONMENTAL SCIENCE

**Host Institution Course Details**

**Host Institution Campus**
HKUST, Science

**Host Institution Faculty**

**Host Institution Degree**

**Host Institution Department**
Life Science
