Course Description

This course offers a study of the main psychological theories on human development as well as the changes that occur in behaviors and psychological functions from birth to young adulthood. The course focuses on different domains encompassing motor, perceptual, cognitive, social, and emotional development. Furthermore, research methodologies and cultural-contextual influences are presented. The course discusses topics including an introduction to developmental psychology; the importance of culture; brain, motor, and perceptual development; cognitive development; the development of language and communication; emotional development; social development; contexts of development; and development in the context of emergency and trauma. At the end of the course, students are able to express knowledge about major developmental psychology theories, methods, and processes underlying change across the stages of human development. Moreover, students understand and apply key concepts in developmental psychology within the areas of perceptual, motor, cognitive, social, and emotional development in different cultural contexts.
