Course Description
This course provides an introduction to the fundamentals of science & environmental journalism, as well as to a set of theoretical and practical perspectives on science communication, the public perception of science, and scientific literacy. It covers the basic tools used to construct news that relies on the classical values in science communication, such as reliability, fairness, balance, independence, and relevance. Students are expected to have completed coursework on news reporting and interpretative journalism. NOTE: This course is the same as COMM 138, but taught in English.
