# **COURSE DETAIL**

## **CLINICAL BIOCHEMISTRY AND MOLECULAR PATHOLOGY**

## **Country**

Spain

#### **Host Institution**

Complutense University of Madrid

## Program(s)

Complutense University of Madrid

#### **UCEAP Course Level**

**Upper Division** 

## **UCEAP Subject Area(s)**

**Biological Sciences** 

#### **UCEAP Course Number**

152

#### **UCEAP Course Suffix**

#### **UCEAP Official Title**

CLINICAL BIOCHEMISTRY AND MOLECULAR PATHOLOGY

## **UCEAP Transcript Title**

**BIOCHEM&MOLEC PATH** 

## **UCEAP Quarter Units**

5.00

#### **UCEAP Semester Units**

3.30

## **Course Description**

This course examines the molecular basis of human congenital pathologies and the alterations that trigger these pathologies. It explores biochemical aspects of the physiological and pathological processes of humans including the function of different organs and systems.

# Language(s) of Instruction

Spanish

#### **Host Institution Course Number**

801397

#### **Host Institution Course Title**

CLINICAL BIOCHEMISTRY AND MOLECULAR PATHOLOGY

## **Host Institution Campus**

Moncloa

### **Host Institution Faculty**

Facultad de Ciencias Biológicas

# **Host Institution Degree**

GRADO EN BIOLOGÍA

# **Host Institution Department**

Sección Departamental de Bioquímica y Biología Molecular (Ciencias Biológicas)

**Print**
