UCEAP Transcript Title FACE PERCEPTION
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description
The course provides an understanding of the development and evolutionary basis of driving forces behind human relationships, and knowledge of the biological basis and psychological manifestations of these influences. Topics include the neural basis of face attraction; development of face preferences; hormone influences on preferences and competition; sexual selection and kin selection; and facial cues to health and social behavior. Teaching is based on the origin of individual differences, and the interaction between experience and biological factors in shaping human mate choice.
