4.50

**UCEAP Semester Units**

3.00

### **Course Description**

This is a first part of a year-long intermediate-level macroeconomics course. Specifically, in this semester the main topic is economic growth. Throughout this semester, the course answers the following questions: What are key factors for economic growth? Why do some countries grow faster than other countries? The course strengthens understanding of macroeconomics by examining economic theory and economic models. Mathematical models are applied in this course. Prerequisite: Principles of Economics.

### **Language(s) of Instruction**

Chinese

### **Host Institution Course Number**
