UCEAP Quarter Units 3.00
UCEAP Semester Units 2.00

Course Description
This course offers an introduction to the interdisciplinary field of psycholinguistics. It covers research areas such as speech perception, word recognition, sentence processing, speech production, and neurolinguistics. The course develops a basic understanding of how human language (including sign language) is organized, how speech perception is possible, how we access words in the mental lexicon, how language is used in the comprehension and production of words and sentences, and how linguistic knowledge is represented and structured in the brain. This course also stimulate you to acquire research experience in the laboratory, focusing on the psychological processes of language use from an information processing perspective.
