Course Description

This course introduces the basic concepts of public finance, including the scope of public expenditure and public revenue, financial regulation (public debt management), and local finance. The first part of course covers the expenditure side of public issues, including market failure correction, public goods, externalities, income distribution and social transfer payments, public choice, cost-benefit analysis, public utility pricing, and social insurance. The second part covers public revenue (tax system, etc.) and other issues, based on "Expenditure and Revenues" principle, including the tax structure, tax efficiency, effectiveness, tax incentive effects, tax equity, financial regulation (public debt management) and local finance and other issues. Other topics include public goods provision and cost sharing, the social security system and income tax, sales tax, property tax.
