Course Description
This course covers the basic concepts, theories, methods, and new developments in studying how people acquire, store, and use information and knowledge. In addition to lectures, laboratory sessions familiarize students with a variety of techniques and procedures in cognitive research. Teaching methods include in-class demonstrations, laboratory activities, and group discussions. Each student identifies a research question in cognitive psychology, designs and conducts experiments, analyzes data, reports the empirical findings, and weighs the findings on an issue based on the specific theories.
