UCEAP Official Title WELCOME TO THE ANTHROPOCENE: SOCIETY, POPULATION, ENVIRONMENT
UCEAP Transcript Title SOCIETY/POPULTN/ENV
UCEAP Quarter Units 8.00
UCEAP Semester Units

5.30

Course Description

As the global population speeds past seven billion, mounting evidence about resource depletion and climate change, and global economic inequality and social injustice, suggests current human development is unsustainable and that we are now living in the “Anthropocene” – an era in which human activity has, for the first time, become the dominant driver of environmental processes, and is causing unprecedented global change. The course shows how Geography, a discipline that draws on knowledge that spans the social and natural sciences and the humanities, is uniquely placed to understand our changing world.

Language(s) of Instruction
English
