PERCEPTION & PSYCHOPHYSICS PRACTICUM
Country Korea, South
Host Institution Yonsei University
Program(s) Yonsei University
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Psychology
UCEAP Course Number 106
UCEAP Course Suffix
UCEAP Official Title PERCEPTION & PSYCHOPHYSICS PRACTICUM
UCEAP Transcript Title PERCEPTION
UCEAP Quarter Units 4.50
UCEAP Semester Units 3.00

Course Description

This course introduces students to the field of perception with a special emphasis on vision. Perception is central to our daily interactions with the world: we can effortlessly navigate through a city, comprehend fast movie trailers, and find a friend in a crowd through visual and auditory perception. While we take the rich perceptual experience for granted, visual perception involves a series of complicated cognitive processes beyond just opening our eyes. The course covers both existing theoretical frameworks and recent research findings in the field of visual perception. We will explore questions such as: How do we see the visual world? Do we see and remember correctly what's in the physical world? How many items can we keep track of and remember at a time? How is the visual system structured and what are the neural mechanisms underlying visual perception?

Prerequisites: Intro Psychology & Experimental Methods in Psychology. Knowledge of experimental design is necessary for this course

Language(s) of Instruction
English
