

COURSE DETAIL

INTRODUCTION TO MACHINE LEARNING

Country

Korea, South

Host Institution

Yonsei University

Program(s)

Yonsei University Summer

UCEAP Course Level

Lower Division

UCEAP Subject Area(s)

Computer Science

UCEAP Course Number

12

UCEAP Course Suffix

S

UCEAP Official Title

INTRODUCTION TO MACHINE LEARNING

UCEAP Transcript Title

INTRO MACHINE LEARN

UCEAP Quarter Units

4.50

UCEAP Semester Units

3.00

Course Description

This course covers foundational concepts of machine learning for beginners with limited programming experience. Students use elementary machine learning algorithms with programming languages, such as Python to solve real-life problems with data sets. In addition, this course develops the mathematical basis for students to understand how basic machine learning techniques such as singular-value decomposition, principal component analysis, and linear least squares for linear regression work.

Language(s) of Instruction

English
