4.00

UCEAP Semester Units
2.70

Course Description
n this course, students investigate the growing literature on the legal application of medical and scientific expertise. The course contextualizes contemporary understandings of and interest in forensics and its popular representations, and considers the history of forensics as a practical example of the dynamics of public understanding of science. Topics include "determining sanity"; "poison and the Victorians"; and "DNA fingerprints, proof, and persuasion."

Language(s) of Instruction
English
