ECONOMICS OF LABOR

UCEAP Transcript Title
ECON OF LABOR

UCEAP Quarter Units
6.00

UCEAP Semester Units

4.00

Course Description

The course provides a comprehensive introduction to modern labor economics. After providing some basic information about characteristics and trends in actual labor markets, the course analyses in some detail the supply side and the demand side of the labor market. These building blocks enable further analysis of special topics such as human capital, labor market discrimination, and unemployment. Emphasis is also given to the empirical evidence on those topics.

Language(s) of Instruction
